

Company Profile

Pump Solutions from a World Leader

Our Company

Iwaki America Inc. is one of over 20 global centers for the manufacturing and support of Iwaki pumps. Our 50 plus years of pump design engineering has made us a world-wide leader of the best chemical handling equipment used in OEM, Industrial, Chemical Process and Semiconductor applications. Iwaki America, along with Walchem, an Iwaki America Inc. Company share a state-of-the-art manufacturing facility in Holliston, Massachusetts.

Located 30 miles southwest of Boston, Iwaki America, Inc. and Walchem are strengthened by sharing combined administration and corporate management resources, yet each company maintains and focuses on its own research and development, sales, customer service and manufacturing. Our modern facilities provide enhanced communications between all departments and allows for enthusiastic and productive employees, many of whom have been with the company for decades. We utilize the best data management techniques to serve our customers in the excellent manner they have come to expect from us.

Quality Statement

Iwaki America recognizes the importance of providing true value to its customers from the initial stages of design specification review to the manufacturing and support of the final product. It is our goal to provide the best technical solution possible and the highest quality product in every pump design we produce. With over 900,000 pumps manufactured annually, our quality has been proven by our customers' satisfaction and documented defect rate of less than 0.01 %.

All products are manufactured under an ISO9001:2008 quality system with the required design process, materials control and manufacturing documentation in place to certify our products will meet the performance and quality specifications required by our users.

Our organization's commitment to quality is integral with our mission statement reinforcing the importance of providing superior products and just as important, superior customer service. Iwaki quality is not just in the physical product, but in every aspect of our business.

Iwaki Japan Saitama Plant
The Saitama plant commenced operations in 1974 and has implemented modern

manufacturing technologies to increase production efficiencies in the manufacture of a wide variety of products in small lots. The Saitama plant primarily produces large pumps.

Iwaki Japan Miharu Plant
The Miharu plant was established in 1977 in Miharu as a

mass-production small pump facility. In 1992, this plant introduced a CIM (computer integrated manufacturing) system to become a dedicated factory for small pumps for OEM use, primarily producing the MD series of magnetic-drive pumps, Iwaki's best-selling product.
